awesome again, butch!
i m so curiouse how it behaves on the track

i wish we could do more sweden-steel like the P122 amazon or PV544. or maybe the ES version of the P1800? volvo and station works well together... ;)
but chances are bad without good blueprints.

Hi Butch
Beim Anblick des Volvo laeuft mir das Wasser im Mund zusammen :)
Wenn der so faehrt wie er aussieht, WOW!!!
Ich liebe dieses Auto seit der Krimiserie "Simon Templar" in den 60ern mit Roger Moore. Da kommt bei mir Vorfreude auf :side:

Grosses Kompliment!!!

Hy Butch and Team,
i have downloaded the Mod and drive it offline some laps!
Here my result:

Body: 10 Points
Sound: 10 Points
Cockpit: 10 Points
Physics: 10 Points (nice to drive and to drift)

This car fitÂ´s perfect to GTL!:woohoo:

Thanks a lot for the good job you all have done with this
Mod!

cheers,

@ ChoW
Maybe here is the solution for you!

If you have the "no cd patch", you will also need the "soundfix patch"

Great work, but only can test it while buying it on
the 3 small tracks. :(

Can t See/ choose it on other tracks, because it s
not listed with the other cars.

Can you help me with that ?

Have you created a TGDYN2001.txt (look on autoupdater menu -> Tweaks)

After that create a new Driver Profile and you should be able to buy all cars and drive them on any track.

Argh, I forgot that there are users without the Altbierbuden-Carclasses. Try it with this:
http://www.altbierbude.de/images/fbfiles/files/Cardateien_Volvo.zip

Overwrite the files and it should work.

Cheers
