In these days I am reordering my Generally game, so I would like to know if there are others Generally drivers here at the Bude, so we can share impressions or suggestion about this fantastic free game.

I didn't know Gene-Rally yet, but it reminds me of MicroMachines (PS1).

May be fun as well (MM was) ... even if it is not about driving around the kitchen table (trying to avoid hitting vegetables) or something like that.

There are a lot of funny tracks and many intersting car packs (for example the DRM car pack).
I find it very relaxing most of all times, but sometimes could be a headache if the track is too difficult, ;)
