
Problem with track selection

Geschrieben von Steve Settanta - 20.08.2018 20:38

Hi guys,

I have downloaded the SPA "ETCC version" for some training offline but in the track selection list the name is reported in black and I cannot select the track (I noticed that some other tracks are in the same condition).

Can you help me to solve the problem? ;)

Thanks
Steve

Aw: Problem with track selection

Geschrieben von diki - 20.08.2018 21:14

Hi Steve,
please check the file ETCCSpa.gdb in the Folder of your game i.e. GTL\GameData\Locations\SpaETCC with an Editor like Notepad.exe or ...

There is a line with Access Level = ???

If the value is 0 (Zero) please change to "Access Level = 2" , save and retry.

It is important, that GTL is NOT running, when you change the file.

Please Report, if this is working.

Regards,
ABB Team, diki

Hi Diki,

I checked the file but the Access Level value is already setted on "2".
I tried with change it to "0" but it doesn't worked.

If I can help you: I have the same problem with Dijon Prenois (both the configurations) and in that GDB file the "access value" is setted to "3".

Same value of Rosin Raceway and same problem.

I noticed that some tracks that worked offline doesn't have the "access value" line.

Thanks
Steve.

Hi Steve,
Delete the Access Level line and retry.

Regards
diki

Ok Dirk

I try the "violent solution"! ;)

However don't loose your sleep for this problem... :P

I have seen that SPA 88 has a similar configuration so I can use that track until the ETCC version goes online.

Thank for your patience. :)

Steve

hi,

i am trying to select the Birubi 400 track on server 3 but i get a message track not installed. I've installed every add on using the auto updater.

I searched for the track manualy and see there are 2 Birubi tracks but they contain both the same download file

Greetings Eric

Hiho

could you please try again.

Glück auf!
