## Car selection problem

Geschrieben von marriane - 25.02.2019 20:11

---

Hi 8-)  
Today i loaded GT Legends i select the circuit in free practice and select my car all is normal, when i enter the garage i am sat in a ford gt40 in a quick race session. no matter what car i choose i always end up sat in a Ford GT40 (sim junkies gulf)when i enter the garage and in a quick race session when i picked a free practice session :angry: wonder if anyone has any idea wots going on :P

EDIT

Created a new profile and this seems to have sorted my problem out :unsure:

Hiho,

you took the wrong online key, must have been the DVD key. To enter the key again you have to delete your profile, save your plr in the Userdata folder before. Then create a new profile and enter the correct online key.

Glück auf!

That happened to Brontal on last race and this wirkef to him:

Just open autoupdater options and push on "set key" (with your key written).  
Hope it solves.
