
Just Wanna Say Hi!

So I got GT Legends from a bundle on a site very recently (two days before posting this in fact). I actually deleted Dirt Rally just to make space to download all the add-ons here.

I remember buying the CD version of it back from a bookfair back when I was in school, and I was stoked when I got it to work somewhat reliably through steam! I hope maybe sometime I can get on the track.

Welcome Charles.

Ask around and you'll get all the help you need.
Racing here is awesome!
