## Hidden Valley

Geschrieben von byagm - 30.01.2020 13:58

---

Hallo!

I havent try the mini Cooper on Hidden Valley because its not on servers, but the Mini Kad Works it was undriveable untill I managed the break preasure and breaking balance.

I don't understand how a default configuration can work so badly, so I share my configuration to motivate people to participate in today's event and not happen otherwise. Here you have what happened on yesterdays practice session and so the final setup of yesterday:

{youtube}zKOLrOblvO4{/youtube}

Hello Agm,

you are so right - I didn't understand that too.

Thank you for sharing your settings. Alternate you can upload your setup - it will be stored in the database of the autoupdater - and on the server too B)

Reinhold
