Hello everyone.
I upgraded Altierbude Autoupdate today, but now I can't get into all the servers. I only allow to enter in server 2, 3 and 4 ... the rest after loading users on tracks, including myself ... the game goes error and goes down, crashes.

any sugestion??:(

best regards

Hallo michaW.
Thanks a lot for the reply.

I change the settings to FULL.
 i guess it works, because now i can enter normally and game dont crashes.

Hope this works fine now... .because Portugal starts the quarentene virus now...and this game and community will be my "salvarion"...the all hope.

Best regards, see you in track
Stay safe michaW
