
sound doesn't work

Geschrieben von brutti - 08.04.2020 19:35

Hi everyone! your mods for this game is unbelievable, simply fantastic. But i have some problems, ina few add-ons sound of the cars doesn't work. For example the mark 1 escort rs or the bmw m1 or the simca rally. Anyone has a solution, maybe i have to change game version(on steam i can switch to german version)? Thank for the replys and for the english but i'm not german.

Aw: sound doesn't work

Geschrieben von CY33 - 08.04.2020 20:25

Hi,
Should not be a problem to fix! Lots of people describe similar issues.
I understand that you do not use the auto updater?
The problem in most of the cases is the wrong position of the sound folder of the particular car being in the wrong place in the sound folder. Some have to be directly in this folder, some need a sub folder. You should find the folders and drag them into the right position.
To find the right position you can check the car's *.aud file. It can be opened with the text-pad. The path is in there, hard to miss. Also the name of the sound folder is there.
If you still have problems you can write again here and we will find a solution.
Have fun on the server!
