
Data logging motec

Geschrieben von Paul36 - 24.04.2020 01:36

Hi guys,

I can't see this topic in the forum, please point me if it already exists (I'm relying on google to translate German to English so could have missed it). I've downloaded XD tool which is a great add on for gtl, but I can't find whether we can use motec data logging like in p&g. Is this happening in gtl?

Thanks,

Cheers, Paul
