Pebble Beach 1956 GTL v 1.00
created by barcika

Is the track in the clip the same as the one above ? Or a different version

I am barcika... it is a full new version, an idea for a race on the historic route these days. B)

Nice always good to see new versions. In the clip it looked way more detailed.

Guys, I sent the track to my friend Uwe, but I don't see it here on Altbierbude - I don't know the reason. I worked a lot on the project, if anyone want to test, download: <https://www.racedepartment.com/downloads/pebble-beach-revival.33465/>

Hmm, I don't know why Uwe isn't answering. And the thread has somehow passed me by. But the track looks cool. I'll test it this afternoon.

Glück auf!

Oooh, that would be nice! Tripoli in LMC or Gr5!
Ooor, F1 71! or 67 or or or

Guys, Tripoli is big, open space, all the time see many object = bad runs, lots of palm trees, all of them can be seen at once = bad runs... and there are not enough resources, not enough information, I can 't build the good, correct grandstand... LOD? Hmmm ... maybe you have an archive onboard video? It would be nice to see... B)

Is the gpl track a good start?

It's on youtube onboard too.

I googled tripoli onboard.

Hiho,
first we have the Pebble Beach GTL v 1.00
created by barcika already. Your reworked version looks better, but has to fight with massive fps drops and microrucklers. You also drive against invisible walls if you decide to go the wrong way. Which one would be the right one is in many places not visible at all.
So the track unfortunately has no additional benefits for us

Glück auf!
