
GTL loose sound

Geschrieben von zetlike - 30.05.2020 20:02

Hello guys.

I carried out the last update of AUTOUPDATER, about two weeks ago. what is happening is that since i made the update, after a few minutes online the GTL loses its sound, i have no audio of the game (environment, engines, etc.) and the game gets stuck, i can't even get back to the garage. ..

does anyone have any idea what it might be?

best regards

Paulo M.
