when Heizen LTF choose this skin, I can not join server.

I check this skin and a I see there is 1 file inside.

I re-install all folder but my problem not solved.

You MUST install the carclasses last, then it should work

Glück auf!

The CarClasses are in the archive folder of your updater, or download here

[http://www.altbierbude.de/component/option,com\\_remository/Itemid,26/func,fileinfo/id,1242/lang,de/](http://www.altbierbude.de/component/option,com_remository/Itemid,26/func,fileinfo/id,1242/lang,de/)

If you copy them from the archive folder, make sure to install the latest version (10.1.3)

Glück auf!

Hi Michaw

I download and extract

I copy paste in GTL folder

than run altbierbude updader (like picture)

I don't get it. How did you test it? And why Autoupdater again? Download Carclasses, unzip it and copy the Gamedata folder into the GTL directory, that should have been it

Glück auf!

Please check in this directory if you have more than one number 3 folder. The folder should contain 37 files and be 4.95 MB in size.

?:\GTL\GameData\Teams\GTC-TC-76\Ford Escort RS2000

Glück auf!

In the folder is a car file. It should contain the following:

Number=03

Team="Blutgraetsche"

PitGroup="Escort"

Driver="Heizen Ltf"

?:\GTL\GameData\Teams\GTC-TC-76\Ford Escort RS2000

I have got 78 yellow folder and 297 mb size

Now what can I do ? <http://www.altbierbude.de/images/fbfiles/images/4.png>

Open folder number 3, open the car file with an editor and post if you have the same entries. Deleting the complete number 3 folder and downloading and installing it manually might also help

No it is not. I have no ideas and no time now. Delete folders 3+4, download them manually, install them and then install the carclasses manually as well. No updater or anything else. And when you have done that, then we'll look again

GlÃ¼ck auf!

I uninstall and reinstall GTL Than update with altbierbudeupdater but not solved .

I'm giving up on this.

Thank you for everything

ok, I agree. If I tell you exactly what you should do and you do something completely different and ignore my tips, then I feel it is a waste of time. I also lose the desire to help. good luck with this problem

You changed the content of the file named Ford Escort Blutgraetsche (Update).

I download manuel and extract. it is not possible to manually paste. Because, After extracting you can see the filename is

04.

Inside the file named Ford Escort Blutgraetsche4 is also 04

so we have two files named 04

You cannot manually copy two files with the same name to the RS2000 folder.

Delete folder in the game, unzip downloaded folder and copy it into the game. Then install CarClasses manually over it. The only way it will work. If that doesn't work for you, then the problem is yours. Good luck!

Glück auf!
