Nabend,

wer beim laden der Escorts mit der Nummer 03 und 04 eine Ladeschleife hat, der macht bitte folgendes

GTL/GameData/Teams/GTC-TC-76/Ford Escort RS2000

in diesem Verzeichnis die beiden ordner 03 und 04 löschen und mit diesen ersetzen
<https://www.magentacloud.de/lnk/B4iFn1fk>

Glück auf!

274/5000

if you have a charging loop when loading the escorts with the number 03 and 04, please do the following

GTL / GameData / Teams / GTC-TC-76 / Ford Escort RS2000

In this directory delete the two folders 03 and 04 and replace them with them <https://www.magentacloud.de/lnk/B4iFn1fk>

if it doesn't work, drive on server 5

Glück auf!

this skin can be canceled if it is so problematic

or

But don't choose this skin.

In this directory delete the two folders 03 and 04 and replace them with them <https://www.magentacloud.de/lnk/B4iFn1fk>

This method solved my problem.

Yes, deleting the old folders and replacing them with the once from the link was the key. :) Thank again.

This is from the trace file: vehgfx.cpp 2552: Unable to read USERDATA\LOG\vehgen.scn: Error loading mesh file AUSTIN_MINI_FENDER_STYL to memory
vehgfx.cpp 2607: Could not find instance "SLOT002"

No idea,
try my folder, overwrite yours

<https://www.magentacloud.de/lnk/k6iFHGXg>

Glück auf!

I believe something is wrong with my instalation after Windows reinstalation. I downloaded ABB Downloader, deleted all of the files and i have just few files to download? Why i can't get the full list of download files?

this Mini is an original car, do not delete...original cars are not part of the updater files

Why not ask first before wildly deleting and all sorts of assumptions about the cause of the error are voiced?

Glück auf!
