
Unable to download

Posted by seminole17jr - 2020/11/20 14:22

For the last couple of days I have not been able to download anything on the site. When you hit the download button it thinks for a few seconds then goes to a blank page that says untitled. Just wondering if it's me or there is a problem with the site at the moment.

Thanks,

Mike

What are you trying to download? Can you give me an example which download does not work for you? Can't see an error.

BTW, you have to be logged in on the homepage, otherwise it won't work

Glück auf!

I have tried different tracks and cars with no luck and I am logged in. I'll try again and if doesn't work it must be on my end. I haven't had any other problems just in the last 2 days.

Thanks and I'll let you know

Mike

Hmm, try another browser. And what about antivirus software? Could something block the download? Maybe put the Altbierbude on the whitelist?

Glück auf!

I didn't think about the anti virus since it has been working just a couple of days ago. I'll look into that.

Thanks,

Mike
