ABB 2021 - Battle of the Dwarfs @ Cadwell
Geschrieben von Duleto - 18.02.2021 19:36

As the topic sais the cars are going to be small. But the Ford Falcon and Mustang are allowed on the server. Will they be eligible to chose?

Hiho Dimitar,

they are not available for choice, if you can choose them anyway, then something is wrong with your installation or your CarClasses

GlÃ¼ck auf!

Fun!

Race 1
Great start and could stay with the top 5 and had a great fight with Zwilling! We both made mistakes and I ended up in front. Lucky to pass manfred who went off and now I was 4th. Manfred hunted me 3 times but I managed to stay in front and finish well. Love the 850 Abarth! Great setup from the 1000, goes well.

Race 2
I can't get to grips with the Assetto Abarth and started 20th. But a fantastic start brought me poast a LOT of Gianninis! Some fought back but soon I was in P11!
Then it was clear I didn't belong there and couldn't get to Janosch and Micha etc. They just drove away. Wolfgang who had two very strong races overtook me very easily and P12 was all I could do aftyer a very lonely race. Or was it? Nope, had too little fuel and had to pit before last lap....P17! :unsure:

I noticed that (having put on a great 695 Competizione setup that my rear tyres were way too soft and perhaps that was the cause of being so slow in the Abarth.

But FUN it is!

Grats to fred and Dimitar who drove fantasticly. fred was completely untouchable in race 1 but in race 2 Dimitar showed great skills and beat AGM!

I understand that we can't run every serie with a championship because of admin work or just ABB philosophy but it still would be nice. :)

Sunday Istanbul BIG5....great track! VERY technical, lets see what happens. I saw that I haven't got a single laptime there! :ohmy: weird. Aparently I never drove there at ABB. That must change! B) 2.06 as best time in Ferrari, Pantera and Porsche and 2.07 in Capri and 2.08 in BMW. Come on boys , lets do it! Only Fin's Ferrari time is recent so, lets get them!

Well, once again i had a lot of fun.

For race 1 it turns out the car was too slow for something great but i think i found the good setup even though i had just 20 minutes of practice before the qualy.

The race was fun but i made a lot of mistakes that didn't gave me the chance to fight for top 10. But fortunately i had great fights with Blade and Bernd and other drivers and i had a lot of fun.

At the end i was able to take P15 just faster than Blade who attack me after the last corner.

Race 2 was better. The car had a lot more potential now and i was able to take P3 on the qualy. I knew can go faster but i was unable to make the perfect lap.

The start was great and me and Fred were able to pull away from AGM and we started a fight for the lead. I was just faster and after one attack from him i was now able to start pulling away.

Everything was going so well until the last few laps when i started making mistakes and AGM, now in P2, started to catch me fast.

At the last 2 laps i had to defend a lot but i was able to stay in front because the car had just a little bit more pace on the straights.

And the penultimate corner was critical. I make it so wrong, hitting the barriers and i toight it's over. But somehow i was so lucky and able to win the race with just 1 tent ahead of AGM. :)

Congrats to the winner of race 1 and the podium drivers from both races.

Dimi's video.....priceless! No horsepower, seating position like in a real Abarth and the emotions to match. Guys, this is the best possible advertising for GTL and ABB!

Well deserved mate. Seldom has a new driver made a name for himself so quickly. A threat to every driver and a great personal addition to the home of GTL.
