always mini
Geschrieben von ****JB**** - 25.02.2021 00:05

Hello, I have all finished.
Installed the game.
Autoupdate completed. GTL patch and unlocking of all cars ok.
Now my only problem is that he always puts a (Mini) on me regardless of the car I choose.
I have entered my Online serial number correctly.
Do you have a solution ? thank you.

Hi,

may be you use the serial number instead of the online number - often error B)

rdjango

Thank you rdjango .
No, I have entered the online number.;)
By cons I solved the problem by opening the autoupdate.
I went into tweaks and came out.
I closed the AU.
Launch the game and now I can choose the car I want.
I did not understand everything, but my problem is solved.
