
Toyota Celica Turbo HD

Geschrieben von MoeZee - 20.04.2021 20:02

So now that these new cars are out, i decided to try out the Toyota Turbo HD.

On Sunday on server 4, i click on the Toyota Turbo and all Toyota Turbos are there to chose from.
then i went on server 8 and click on the Toyota Turbos and there was only 3 Toyotas to chose from. (2 red and a white Toyota)

So i go back to server 4, click on Toyota and all Toyotas are there to chose from. I pick out the blue one, did a few laps on server 4 and then moved over to server 8 where i click on the Toyota and again only 3 Toyotas are there to chose from but this time its show me 2 red and my blue car. The white car disappear and was replaced with the blue car.

Today Tuesday, i click on Toyota in server 4 and i only get 3 cars to chose from. 2 red and a white one.

i go over to server 8 and this time i only get 2 Toyotas. 1 red and 1 white.

Is this a problem with the server or is something limiting the access to the Toyotas?

so far, i only see this going on with the Toyotas

Simple explanation, 3 skins were driven in the former DRM, but 2 skins were only driven in the WCM, so everything is correct. Just because a car is in both classes, does not mean that all skins are available in the respective class.

Glück auf!
