Amazing racing as well.

I had good car this time and was able to fight for podium. The start was OK even though another driver lost his car and went perpendicular to me. :D

After i started from P8-9 i was able to overpower most of the drivers ahead and went to P2. ODB and Nilski were too fast so my battle was with Manfred.

I think i made the right decision not to change the tires at the pit stop because i had 10 seconds lead to Manfred.

He change his and i had a decent lead which gave me the chance to drive safely until the end.

Grats Nilski and everyone.
