
ETCC - Easy Install

Geschrieben von Duleto - 19.10.2021 14:42

Is there a way that you guys can make a ETCC only install that some guys can use. A friend of mine wants to join for ETCC but he just don't have 70 GB free on his HDD to do that.

Is there a way we can create an ETCC install with the cars, tracks and files that are needed for ETCC only? Or at least a list of the files he needs?

the easiest way is to clone your HDD.

1 TB costs 79.99 euros on Amazon

Samsung offers a cloning program for this

he saves himself a lot of work

Greetings Tom

Share with him all the data except the "Locations" and "User Data".
It prably will work if you only share the gtc-tc76 instead of the whole "teams" folder.

Its not gonna have the zip files folder, so, if there is any update you'll need to update and share with him again.

Good luck Hristo!

Hi,

updates can also be downloaded and installed manually from the downloadsection. B)

Hiho,

I've made something ready here to try.

<https://www.magentacloud.de/lnk/b3ilHHm6>

Is a GTL Steamversion in which I have copied the content needed in my opinion. Quick and dirty, sound folder is completely copied, there you can still delete some files. Packed about 7.5 GB, unpacked the installation then consumes 11.2 GB on the HD/SSD. Note: German GTL installation, language files has certainly someone and I do not know right now, where they would have to be copied.

Glück auf!

Unfortunately It's not working that way. The game crashes on loading. We will try to download only the cars from (ABB GTC-TC-76 Div.2) and the patches with the auto updater.
