Hi guys,

PapabÃ¶r as already announced, since I'm apparently known to tinker with setups which can circumvent Rookies can be found in the folder by:

- Hiltop
- Rouen
- Mosport

a setup for the 935er devil :-)

The name of the setup should be "FH 935"

There are setups each on their own Fahrstyl still have to fit. Depending on the brake feel, etc. please adjust. I find that it is a good balance between everything, but there are the ghosts we know :-)

On Sunday I will probably be there for you and will support the setup, so that everyone here is right for itself finds.

Regards
Fire Head
