Hi Carlo,

welcome here on Altbierbude.

Please verify your online key (length must be 28 characters). Use Autoupdater or Windows Registry Editor (regedit.exe).

Cheers

Andreas

Hi and welcome to the Bude Carlo,

If you look on the Altbierbude Home page in the left side middle section you should see the heading Altbierbuden-Lobby. This explains what you must do.

If the page is in German and you cannot read it then look at the very top of the Home page and you will see a German & an English flag... press on the English flag and most of the home page will appear in English.

Catch you on track.

Hi Carlo,

start your autoupdater and take a closer look at "tweaks". There you can find the possibility, to set a new price for all cars. Don't set the price to "0", for you can't sell them afterwards anymore. Setting the price to "1" causes no problems.

Cheers
