Hi,

The Indy track is not on server 2. Why not?  
quite easy.....

it isn't ready yet, I working hard on it and it (hopefully) will be ready on Sunday morning.

Current version has several problems, for example it offers 24 cars in the grad/garage only and pitstops are nearly impossible becasue of a prob in the AIW...

cheers,  
Uwe

Seems as though the previous Indy track could still be used for practice on the server. Yesterday, the new track was releases, and it's still not up on the server today. hmmm?

the new version is allready on the server :D

Of course you can join with old version since .gdb-name is still "Indianapolis", but you'll get .gdb-mismatch....

Pls. download and use current V2.0, I hope it's worth tough :D

cheers,  
Uwe
