New track \"Harestock\" crashes my GTL

Geschrieben von pasender - 30.06.2012 11:05

_____

Hi all,

I have a problem, when i use this track, GTL always crashes upon loading it, at about 50%.

I tried re-installing the track, the problem is still there.

This is not a critical issue as is still have the other 424 tracks to drive on ;), but if someone has an idea for support ...
:whistle:

_____

Hi,

can't figure out any problems.
Please download the track manually from our site and try reinstalling.

Good luck
Tom
