
Connection issues - Saturday 17-11-2012

Geschrieben von Alucard - 18.11.2012 01:03

Hi all,

I was wondering if anybody else had connection issues tonight? I could join the servers, but most of the time couldn't see the other cars, especially on the starting grid. I had to leave before start to avoid collisions in every race in different servers, because I was always alone and couldn't even see other cars in the monitor window.

My connection is good (optic fiber 30MB/3MB) and I haven't had this issue before, so I was wondering if someone else experienced the same problem or if there was some problem with the servers or lobby. :unsure:

I didn't have connection problems tonight but I did have this problem before and what worked for me was a reinstallation found in the autoupdater.

Lots of new cars and updated cars lately. Reinstall with fresh files and I was able to correct this problem.

I forgot to mention that after I had also the same issue in the Pielbierbude GTR2 servers. Let's see how it runs today, I'm at the GT Legends lobby waiting to join. :dance:
