
Slovenly recorded vehicle logs at the \"Bude\"!

Geschrieben von derDumeklemmer - 23.11.2012 22:57

During an unannounced audit of the records irregularity was found.
Since early days of the "Bude" the logs where not handled accurate, wrong Odometer values are the result.
The appraisal has shown that uncompleted laps were counted with full lap distance.

The result is that ~42 mio. kilometers where charged to the drivers meanwhile our nit-picking auditors found out that only ~23 mio. kilometers of virtual asphalt were offered to the drivers.
Luckily nobody was harmed because due to the fee rules of the "Bude" the usage is free of charge.

Faced with these accusations officials promised improvements in the recording and review of all logs.

Pls. discuss and place improper abuse here. :-D

Hi Uwe :)

Big job :(

So, you've removed only incomplete lap or every lap that doesn't produce time (included corner cut)?

Advantage of the fact that you are correcting the report to notify you that in first time, track "Nordschleife VLN 2007 - Release Candidat 4" recorded 292km/lap instead of 24,34km/lap, for example my record with Mercedes 300SL 03/06/08.

May be that other drivers have the same situation...

Cheers

Luke

Hi Luke,

due to the coplete rebuild of the databe we've discovered a couple of BUGs in the website code..... ;-(

So pls. forget about current data.
I will debug and fix the code first, that we will rebuild hopefully correct data again.

Pls. have a little patience....

Cheers,
Uwe

Geschrieben von derDumeklemmer - 25.11.2012 16:54

Hi,

I've restored the old (false) data since websitecode is not ready to the data correction yet.

Pls. have a little patience, the BUG fixing may take some days...

cheers,
Uwe

:unsure: Tut tut Uwe m8. This is the second time in 6 years that you have made this mistake with distances driven!!!! :P
:whistle: B) :geedee:

Hi Gordon m8,

no no, mistake/bug is at GTL itself....

GTL dedi-server reports unfinished laps as finished onces.

So full lap distance was booked to the vehicle log althoght driver might only left the pits and pressed ESC.

I've improved the calculation base meanwhile so only finished laps will be recorded now, but all allready existing records needs to be re-handled by the software to correct the the accounts.

Since a lot of tracks/cars changed meanwhile it's not so easy

But I'm hopefully looking forward to get data sorted soon. ;-)

(It's a bit time consuming since we do have ~800.000 result files from all over the years)

cheers,
Uwe

He he Uwe, you certainly like to punish yourself with seemingly impossible tasks m8.

I wish you the best of luck doing this and for you always to have a full bottle of whiskey near to hand!! :whistle:
:allcoholic: :dance:

Hi Gordon,

Geedee wrote:

yes, sometimes it seems so ;-)

Next version of the imported data is available.

Hopefully the background-task will count the laps more preceize now.

Even if cars are changes during a single session these laps should be imported now (in past only laps of the last car used were counted).

The double import of data due to the summer-/wintertime bug of the GTL-dedi-server should also be solved now.

cheers,
Uwe

You are the summer-wintertime bug of the ganeserver?

.....sorry then you are history now, I've created a workaround for you!

LoL

Cheers,
Uwe
