Helsinki Thunder

=====

Helsinki Thunder was build from the scratch for rF Riku Sarpila.
The rF version was converted to GT2 by Zwiss who spend a lot of
efforts to improve the original build.
I've taken the GTR2 version as a basis for this GTL conversion.

Both of them gave me their permission to convert this beautiful track to GTL.
A very BIG "Thank you so much" for this kind offer!
Pls. find the original readme files for rF>R2 in this archive.

- My biggest respect for their fantastic work -

Weâ€™re offering the result of all our working hours to all of you free of charge but we
ask for one single fee from your side:

Pls. give a little respect to all these working hours all of us spend for free for your entertainment!
This project is a âœ“take it as it is, or leave itâœ“release, pls. see EULA for more detailed information.
