
can't connect to servers and other problems

Geschrieben von mctron - 21.05.2013 13:18

I can't connect to any of the bude servers and when I select a car in single player it goes to a regular car.

I have another install of GTL that works great online but the bude version just won't work.

Hello mctron,
has the Autoupdater completely done his work?
If not you will have not the right car classes.
cheers,
kart1803

Hi,

try to reinstall (button) all Data with the autoupdater.

cheers

Hello,

please have a look at this thread, perhaps it may help you.

http://www.altbierbude.de/component/option,com_fireboard/Itemid,99/func,view/id,49186/catid,43/limit,6/limitstart,18/lang,de/

Otherwise there is somewhere in the forum a translation for installing GTL for ABB in the wright order but I didn't find it yet.
