Just saw this on facebook:

We're looking into getting some car body models done for us on a paid contract basis, if any of you are talented car modelers, please send examples of your work to [Contact@camshaftsoftware.com](mailto:Contact@camshaftsoftware.com)

Ideally you'd work in 3ds max as that is what our tool chain works with, but other packages could be possible.

Authors are those guys:  
<http://automationgame.com>
