Problems with some cars

Geschrieben von alioramus - 11.06.2013 16:48

_____

Hi

I intalled some cars from this web and I have this problem

http://s2.subirimagenes.com/otros/previo/thump_8485814gt.jpg

http://s2.subirimagenes.com/otros/previo/thump_8485823gt-2.jpg

Some cars (Toyota Corolla, Opel Kadett B/C, Commodore, BMW 2002) doesn't have their "types" and I can't see them with the rest of "my" cars. Those cars only appear in dealership and my garage.

What can I do to fix it?

Thanks and sorry for my english

_____

You need the Altbierbuden CarClasses to run the MODs we offer. Best way to enjoy the complete stuff is using the Autoupdater.

I've installed that patch and repair the problem, but now other cars disappear with the same problem. Why?

I suspect that I have to download all the cars of this site only but I prefer to have in my game a Simca 1000 that a Ford Anglia.

_____

You cannot use other Mods with the Altbierbuden CarClasses and you also cannot run Altbierbuden MODs with an original CarClass. You have to decide what do you want or use a second GT Legends installation.

_____

You need to make a "altbierbude Only" installation of the game.
