:(Did not work for me. DId a couple of cars and then nothing. I wanted the ETCC cars and possibly to race online but nothing. I tried it 3 times and it gets the same error message. Changed physics. I did not change a thing so this is confusing. I am willing to try it again but I don't want every car!

As I mentioned in your yesterdays thread, you cannot drive online on our server without all the Altbierbude stuff and an ETCC-MOD doesn't exist!

BTW, don't use the Autoupdater with a GTL-installation which contains MODs from other sides.

Cheers
