Multiplayer lobby connection.
Geschrieben von gbriden - 03.01.2016 15:52

_____

So had a major fail on my system and lost most everything had to re-install GT Legends.

Now I am unable to see anything when I log onto the game lobby there used to be MANY rooms running now only 1 or 2.

I seem to remember having this issue before or is this a problem on the Server end.

Any help is appropriated.

Thanks

Glenn

_____

Hi

seems you are in wrong Lobby.
Delete IP-Lobby-files in your GTL main folder.
Then it should work again.

greets hayman

_____

Yeah I think you are correct but I have NO IP file in my GTL folder that I made sure removed right at start.
I still load the lobby with only 2 rooms deleted and re-install same thing.
