Hello on the green Altbierbude.

Please try it again. I downloaded it yesterday without any problems.

Cheers

so, my previous installation of ABUpdater all cars appeared in autodealer menu, but without skins. I've made reinstall as (http://www.altbierbude.de/component/option,com_fireboard/Itemid,99/func,view/catid,9/id,49960/lang,en/) recommended. Now there are no extra cars, no extra tracks in menu. When i tried to connect ABB server, i see the message "track is not installed" - as before reinstallation, as now
