Hi Leute

wäre gern mitfahren, wie ist denn das PW für Server 5?

Dieter

Bonjour

I don't understand the problem I had yesterday :(. You had some troubles with me on the track. I made the autoupdater a few times and the problem is always here. Micha said to me it's a problem with the classes. May I uninstall GT Legend/Gamedata ? :ohmy:

Hello,

you can make a new installation from the menu inside the autoupdater. Be sure to have only content from the Bierbude and the original game.

Hello Pat,

please download this -->

http://www.altbierbude.de/component/option,com_remository/Itemid,26/func,fileinfo/id,1242/lang,de/

unzip and copy both files into your GTL directory

Glück auf!
