Release Toyota Celica Turbo GR5

Geschrieben von H1TM4N - 12.11.2016 19:29

Brickyard Legends Team present :
Toyota Celica Turbo

The Toyota Celica LB Turbo was a Group 5 Special Production racecar version of the 3-door liftback first generation Toyota Celica 2000 GT built by Schnitzer via Toyota Deutschland to compete in Division 1 of the DRM.
The A20 Celica was built to compete against the Porsche 935s that had dominated international motorsport and also the Division 1 of the German DRM series for Group 5 cars.
It competed in the German series in 1977 and 1978. Plagued by reliability problems, it managed to finish twice and win a non-championship race. At the end of its European career, it went on to compete in Japan with minor success.
Throughout its competitive seasons, it was the only non-German car to compete in the top division of the German series.

-includes 3x bodystyles, 1x cockpit and a total of 5 skins

- mod includes one physics set :
  CELICA_TURBO.HDC - 1977-1978 DRM championship

  - the mod is linked to GTC-TC-76 class and the BMW CSL.

Credits :
- papag21 : 3d, mapping, file structure, templates, skins
- greg7 : physics
- jandri : sounds

Installation instructions:
- extract folder to X:/GTL/

Enjoy

Der Autoupdater zeigt leider nur eine Fehlermeldung:

"error-perm: 500 could not get file size"

Der manuelle Download funktioniert allerdings tadellos.

GrÃ¼ÃŸe
Olaf
