mercedes 300sl gullwing and others dont work
Posted by Takona - 2017/02/20 14:46

_____

Hello I have a problem I've downloaded Mercedes 300SL gullwing and he is not on the list of cars before the race, only appears at the dealer, and only you can take a test drive. I've downloaded also Mercury Cougar, correctly, it does not appear anywhere, neither the dealer nor the list of cars. The same problem is with the skin for BMW CSL Gr.5 that I've downloaded from here. What is the cause? Please help.

(I dont use altbierbude client, autoupdater and others ...)

_____

If I understand tutorial I install clean GTL V1.1 and download autoupdater

"http://www.altbierbude.de/component/option,com_remository/Itemid,26/func,fileinfo/id,650/lang,en/"

who download everything I need and I'll be able to play on servers altbierbude, without installing python and others?

Hiho,

here --> http://wiki.bierbuden.de/GTLInstallation/en

is an other description and no, to play on our servers, you need the ABB Carclasses.

Glück auf!

f I want to install albierbude autoupdater, then I must also install python. (Not I found another version autoupdater). Program python is not installed so autoupdater does not work, here's the problem. :unsure:

The Autoupdater should install python by itself...

Glück auf! http://www.altbierbude.de/images/fbfiles/images/Unbenannt-a4def197aa45f9f62d1c307416a2be8b.JPG

_____

I know, but it is installed by Windows Installer, which closes the installer (this is probably a problem with .msi). I can not install it. There is no alternative? :unsure:

Without python? No i think. Did you try to install python manually before installing the updater? Or google python msi installer problem

Glück auf!

_____

I installed manually before I installed the updater, still did not work, I tried to repair the installer fixes the registry and other ... Nothing helps.
