
Autoupdater doesn't install -PROBLEM SOLVED-

Geschrieben von AgGuarini - 12.04.2017 18:44

I need the
altbierbude_en.pyw or altbierbude_de.pyw
to start the autoupdater.
The installer don't work anymore. I tried with 2 pc.

Please send me that file.

Python & Wx are correctly installed.

Here is the error of installer.

Aw: Autoupdater doesn't install

Geschrieben von rdjango - 12.04.2017 19:18

Hello,

just did it - and there was no problem with the download. Also you can go to the adress in the errormessage and you will find the right files there for manual install.

Perhaps your computers firewall, router or security-suite doesn't allow the autoupdater to get the files from the internet per ftp - may be.

Good luck
rdjango

I tried again.

With Antivirus and Firewall off.

The Bierbuden_Autoupdate_WebInst.exe download the client but when must download python (that i have installed manually 2.7 & 2.8)gives me the error.

So don't create the software autoupdater.

If anyone upload the file

altbierbude_en.pyw

or

altbierbude_de.pyw

i'm sure that the autoupdater works with this file, because in the past i had the some problem with the installer and i saved that file.

Sorry fot the english

Try this...

GlÃ¼ck auf! <http://www.altbierbude.de/images/fbfiles/files/Python.zip>

OHHHH!

I need that file.

Now the autoupdater is started.

I love you.

Thanks for the help, and for those that help me in private.

Great Forum, great people.
