
BERND

Geschrieben von MoeZee - 22.06.2017 21:06

This is a public apology going out to BERND in the LMC Lemans 77 race.

I was limping back to the pits with a broken suspension.

ran off the track and was coming back on the track when i saw the car that you were following and was looking at you in my rearview mirror but at that point my car kick out or spun out from the off road onto the pavement and right into your path.

Yup, no excuse for that but with a broken suspension, little difficult to handle the car. Should of been more careful and so with that i sincerely apology for ruining your race.

I do not chat when racing cause it is a distraction for me and slows my game. Waited till after the race to speak with you but you were not there.

After the race, i had to go to work.

I work out of town for 4 days a week so sorry for the delay in response to this incident.

=====
