
I HAVE BEEN BOOTED

Geschrieben von Marcelo - 20.07.2017 17:42

Hio Guys!

After the last win 10 update I can join servers, I tried everything, reinstall GT Legends and autoupdater, re-registration and everything I can, I read all posts about this problem I do everything and I'm still having the same problems.

Any idea?

A lot of thxs !

Hi Marcelo,

can you join the Lobby? Any failure message?

Glück auf!

I can join the lobby, and i have all cars, when i enter to the server the message is the next one: You have been booted, and the message the car is not allowed, I re-registered once and i can stay in the server, but i go out the game and enter again and then I have been booted again.

Any Downloads from other sides e.g. nogrip in your GTL folder?

Glück auf!

maybe you need to download the "Altbierbuden Car Classes" again and copy them to your GTL-Installation, some weeks ago i had a similar problem after an error in the Autoupdater.

Marcelo,

try to use DX8 (gtlconfig.exe) and delete the Garage.gar and Career.bl1 in your user Folder. Make a backup from Career.bl1 before...

Glück auf!

Make a copie before delete them and start the game

No restore if everything works

Another solution, create a complete new Profile and try

Glück auf!

No more ideas...:(never heard about such Problems...:S

Everything crashed after Change Nvidia Settings...crazy :S

Glück auf!

Marcelo, did you have an old DVD Installation or steam gtl Version?

Glück auf!

Geschrieben von rdjango - 22.07.2017 19:00

Hello Marcelo,

the Ford GT problem: may be you used the wrong key for registration in the lobby.

You have to use the online-key and not the dvd-key for onlineregistration. If not you always get the same car and get out.

Cheers

Hello,

so i could see in an old post you have the steam-Version. If you are sure you have the right online-key (?) there must be another reason for your problem.

Please tell us what it means "you have been booted".

Crashed the game only or crashed windows and your computer is booting?

rdjango, how can i change the key?

Aw: I HAVE BEEN BOOTED

Geschrieben von Marcelo - 22.07.2017 21:14

In autopdater tweaks appears my cd-key, i justy play set key?

Aw: I HAVE BEEN BOOTED

Geschrieben von rdjango - 22.07.2017 21:47

Hello Marcelo,

if you used a wrong Online-key its the best way to wait since MichaW (or another admin) can help you because he has the possibility to look at your key on the server - per pm.

Otherwise you can try to look at the registry :

Key: HKEY_LOCAL_MACHINE -> SOFTWARE -> Wow6432NODE -> 10TacleStudios -> GTL -> KEYS

(Windows7 64b)

There you may change the key. And then you have to make a new Online-account ingame. Don't know if it works in Windows 10.

Cheers

rdjango, I play set new, in the dialog where appears my key and now it works...I don't understand anything...but it works...I spent 3 days uninstalling and installing, copying files etc etc...and results that i click on this buttom and now works fine...crazy old school game blowminder.

A lot of thxs for the help !

Hi marcelo,

congratulation ;) - you are not the first who used a wrong key and didnt noticed it - :whistle:

so have fun - and cu online :)

cheers
