Hi guys. I'm new here and a little confused as to how to connect to the server as I haven't played this game in a while. I'm also confused if I need to download everything from the autoupdater as some can't download since there's no peers to download from. Hopefully someone can help. Thanks!

Hi,

there are peers online, it should work. Got the right Download-Ticket?

Gruss

Hi,

did you play with wifi or with lan connection? If wifi, try a lan cable. And you didn't need python 3.0 if you already have version 2.7 installed and your updater runs...

best regards and GlÃ¼ck auf!
