
Muscle Cars

Posted by Bestcamaro68 - 2023/11/11 18:05

hello everyone,

I have some very nice cars that I have in my files, from the time when I drove with the "gamers cribs". these cars are not in your download list, it could perhaps interest you for perhaps creates a muscle car championship in the future.

here is the list of cars:

chevrolet camaro 1967/68

Chevrolet Chevelle 1970

Dodge challenger 1970/71

plymouth AAR cuda

plymouth road runner

plymouth SC cuda

1965 Pontiac GTO

1969 Pontiac GTO

Ford galaxy 500

chevrolet camaro ss 1969

Dodge Charger

If this interests you, you can contact me.

A+ Louis

Moin Bestcamaro68,

I hope you have had fun with the Musclicar Pontiac yesterday on Riverside. It would be nice to have a look at the Musclicars of your mod. Did you upload it yet ? B)

Do you know a site to host the files?

yesterday I had a lot of fun with you, a little difficult to ride, it's been more than 10 years since I last raced:S

My name is Louis ;)

Hiho,

unfortunately not. You would need a premium account to download.

Glück auf!

Fine :)

sorry, the upload is not practicable for me because I have to download every single file. Its usual to pack all files in one .zip-file and upload it. Then we can unpack it with all folders and files.B)

For this mod they're located in the following three folders within \GT Legends\Sounds\CarsDCHFirebirdI could provide a more specific list of all the subfolders and files, but it may be easier to up- and download those as a whole and we can pick out the necessary files ourselves on our PC. :lol:

So Louis, if you wanna zip and upload those folders too... ;)

Moin,

the rfactor mod is allways on mediafire as download available. Also a soundfile. But its for rfactor - perhaps the same files but another structure.

<https://virtualracingsports.proboards.com/thread/19/release-classic-muscle-cars>

maybe a help?

I could work with that somewhat, but in the GT Legends mod there's some references to additional sound files that are missing in the rFactor mod, seems to be mostly for shifting or backfires where I could just re-use the singular file from the rFactor mod, but getting the "original" GT Legends sounds would still help.

Moin,

I didn't notice it the first time, but the download for the rfactor-version see above link seems to work allways and there is also a download for the sound.

Perhaps same files but other folder structure so its a puzzle.

That's what I was using, most soundfiles referenced in the GTL .aud files are included there (albeit with a different name etc.), except some of the additional ones I was talking about.

Moin,

found the original files I think
Season 10 and an upgrade auf Season 11

<http://www.mediafire.com/file/ax7wwga4srxw8d5/Gamers-Crib+Muscle+Cars.+Season+10+Car+Pack+v4.rar>

<http://www.mediafire.com/file/ej80mc7alndrs6d/GCMCL-S10-to-S11-Upgrade-Part1-v2.rar>

There are some cars allways available on ABB. Not only for this reason its strongly recommended to use a seperatly installation of GTL to test these cars.B) B)

If anyone want to turn the mod into an executable ABB test version, you are welcome to do so. For me, this is far too much effort for these cars. The folder and name structure is completely different, the source of the cars is often unclear. That would be an extreme amount of work, so I'm out, sorry.

Glück auf!

Moin,

just found this for one of these cars

<https://esport-racing.de/plymouth-road-runner-1969/>

don't know if its better for ABB, the same car mod above is made by sunalp (readme)
