
Ford Capri III Turbo Update

Geschrieben von H1TM4N - 16.04.2021 22:08

Brickyard Legends Team present :
Ford Capri III Turbo

- mod includes seven physics sets :
 - ZAKSPEED_DRM78_TURBO.HDC - 1978 DRM championship, 1.4lt
 - ZAKSPEED_DRM79_TURBO.HDC - 1979 WCM,DRM championship, 1.4lt
 - ZAKSPEED_DRM80_TURBO.HDC - 1980 DRM championship, 1.4lt
 - ZAKSPEED_DRM81_TURBO.HDC - 1981 DRM championship, 1.4lt
 - ZAKSPEED_DRM81D_TURBO.HDC - 1981 DRM championship, 1.4lt (Diffuser)
 - ZAKSPEED_GR580_TURBO.HDC - 1980 WCM,DRM championship, 1.7lt (Diffuser)
 - ZAKSPEED_GR581_TURBO.HDC - 1981 WCM,DRM championship, 1.7lt (Diffuser)
- the mod is linked to GTC-TC-76 class and the BMW CSL.

V2.9 update 2020

- Less down force.
- Somewhat less forgiving tire
- Less drive train friction
- suspension geometry change
- Polar moment of inertia change
- Rear roll center ie: track bar heights adjustment range added for use with BYL advanced menu mod which includes track bar adjustment options.
- Other stuff.

My original version was a bit of an experiment to see if I could make a really fast car like the Capri still usable and fun for a less experienced driver, I realized even as we released the first version that I had over shot the mark a bit and the car was a bit to easy to drive.

I have tried not to go too far back the other way. This version is a little less forgiving.

The short answer is that it is a little slower in the corners and faster on the straight than the original version. lap times will be similar but a touch slower.
