
How to mark the classes of unclassified vehicles?

Geschrieben von monzaq3 - 14.11.2021 00:05

Hello! Does anyone know, is it possible to mark the classes of unclassified addon vehicles? For example, I downloaded the Jaguar XJS mod, but I can't choose it for any career event because it doesn't relate to any class by default. Obviously there are lots of addon cars for GTL that are unclassified. So can I mark the classes by myself and how?

I believe you can do it by adjusting the .car file:

E.g. how it looks for Cortina:

```
classes="SIM_ABB_Server2, SIM_FULL, SIM_GTC, SIM_TC65, SIM_CORTINA, SIM_GTCTC65, SIM_NOBRIT,  
SIM_TC65NOT, SIM_BRITISH, SIM_DRIFT, SIM_NOKING, SIM_MASH, SIM_NOSHORT, SIM_NOLONG,  
SIM_ABB_65MIX"
```

For example "SIM_DRIFT, SIM_NOKING" correlate to the name of the cups, like "Drift Kings" of Cup A, or "SIM_TC65" to the class itself.

You would have to do it for each skin separately though. And I don't know if this would affect online, hope that someone can give more info.

To Pavel Stopinski:

Thank you very much!!! That works! I've just been struggling so much trying to win in the last event of Cup C because all the vehicles I have are either slow or nervous. So now I can choose from addon cars! Thanks again :)
