Download: Mini Sprint Mod
Geschrieben von Geedee - 25.03.2008 11:51
_____

To be able to participate you MUST HAVE ALL OF THE CARS LISTED for that race night.

http://www.altbierbude.de/images/fbfiles/images/x_Miini_Sprint_.jpg

  Mini Sprint Mod ~ 5 Cars for download.
Power to Weight Ratio: 140 - Horse Power: 185
Speed: 158 - Weight: 1320

Mini Sprint Mod ~ 2 Cars (you must have these first)
Numbers: L42, 59
Download from:
NoGrip: http://www.nogripracing.com/details.php?filenr=9005

  VERY IMPORTANT
The 2 cars in the starter pack are Mini's of different speeds ~ A slow one and an ultra fast one that is faster than the 1310 Mini Cooper S. But both of these can be changed to either the slow model or the fast one by simple changes to a line in the CAR Files so it is IMPORTANT that you read the Read Me with these cars.

On the single car downloads the 63G is also the faster Mini and 64G a slower one, but again both can be simply altered to be s slower or faster version.

Some drivers have had problems with this file so a Patch has been made and can be downloaded from: NoGrip: http://www.nogripracing.com/details.php?filenr=9042

Single car downloads ~ 3 Cars
Download from: NoGrip:
Mini Sprint Sinalco No 25
http://www.nogripracing.com/details.php?filenr=9136
Mini Sprint 63G
http://www.nogripracing.com/details.php?filenr=9018
Mini Sprint 64G
http://www.nogripracing.com/details.php?filenr=9023

Once you have installed the 2 car Mod then copy your saved UserData & Sound files back to your GTL folder and when prompted to overwrite press YES.

INSTALL PATH GTL/GameData/Teams/TC-65/Min Cooper S/Mini Sprint
~~~~~~
These cars are worth the effort installing as you find them really powerful and fun to drive. Like the 1310 Mini you can use the power of the engine to get the front wheels to pull you quickly around the corners.

Set-up note: the tyre pressures are extremely high on these cars and about twice as much as in the normal Mini. I found that halving the pressure makes the car handle better.

I can send these 'CAR Files' to you if you would prefer it. Just send me a PM (personal mail) with your e-mail address on it requesting these.

Please try your cars before driving On-Line.
Try to install a second GTL just for Addon cars - see Making the best of Addon (modded) Cars

Download: Chevrolet Camaro SS
Geschrieben von Geedee - 25.07.2008 16:15
_____

To be able to participate you MUST HAVE ALL OF THE CARS LISTED for that race night.

http://www.altbierbude.de/images/fbfiles/images/x_Chevy_Camaro_SS.jpg
   Chevrolet Camaro SS ~ 5 cars available in one download.
Power to Weight Ratio: 126 - Horse Power: 350
Speed: 141 - Weight: 2772

Download from:
Anyone know where it is now please?

Easy Install instructions: Unzip and place the GameData folder into your GTL folder and when asked to overwrite press
Yes All. That's it ...done! ! To buy and use these cars you must first:
1…go to race or practice and chose a track.
2…then when you go to choose a Camaro you will see black Cobra and the small icons on the right hand side will be
grey. This is normal and it is because it is a GTR2 car converted to GTL but it does handle like the GTL Falcons &
Mustangs

If you want to choose these cars from the dealer as usual you need to open the 'CAR File' (in each car folder) with
'NotePad' or 'WordPad' and change the 'classes=' to… classes="SIM_FULL, SIM_GTC, SIM_TC65, SIM
SIM_MASH, SIM_NOLONG". Doing it this way will mean that when off line racing these cars may join in.

Please try your cars before driving On-Line.
